

SPEEDS™

Tactical Decontamination System

MADE IN THE U.S.A.

SPEEDS™ 24H - HARD-PACK CONFIGURATION

The SPEEDS Expedient Personnel Decontamination System (EPDS) is a tactical, self contained, independent and fully validated wet decontamination process (biological and radiological agents) and dry decontamination process (chemical agents) field personnel decontamination system. Highly portable, the SPEEDS system permits rapid removal of personal protective equipment and effective decontamination of up to 24 personnel involved in a Chemical, Biological; Radiological or Nuclear (CBRN) event. The SPEEDS system is designed especially for tactical operations.

SPEEDS is the only validated CBRN tactical decontamination system available on the market. Currently deployed worldwide with DoD, OGA, state and local, and corporate security forces.

Applications

The SPEEDS CBRN decontamination system is designed to directly support the tactical operations mission by providing a rapid, effective and versatile CBRN decontamination capability in the event of a CBRN incident.

For chemical agent decontamination SPEEDS utilizes Sorbant Decontamination System (SDS) as the decontamination media combined with validated comprehensive personal protective equipment cut-out procedures to provide a safe, effective and expedient means to decontaminate up to twenty-four (24) contaminated persons.

For biological; radiological and nuclear agent decontamination SPEEDS utilizes Calcium Hypochlorite solution as the decontamination media combined with personal protective equipment un-dress procedures to provide a safe, effective and expedient means to process up to twenty-four (24) contaminated persons.

Specifications

The rugged, modular SPEEDS is a lightweight man-portable system that can be used in wet or dry environments in both day and night conditions.

HARD-PACK CONFIGURATION

Material: Model 1660 Pelican case, unbreakable, watertight, airtight, dustproof, chemical resistant and waterproof. Includes an automatic purge valve for quick equalization after changes in atmospheric pressure. Equipped with heavy-duty wheels, retractable extension handle and multiple fold-down handles.

Dimensions: 31.5" x 23" x 19"

Color: Black

Approximate

Ship Weight: 100 lbs.

Pricing Information

SPEEDS™ 24/H **\$ 5,995.00**

24-person decontamination capability; hard-pack configuration.

CONTENTS

- (3) Compartment bags
- (2) Illuminated Hot and Cold line marker
- (2) Collapsible shuffle pit twenty (20) gallon
- (5) Collapsible five (5) gallon media bucket
- (5) Decontamination wash-mitt
- (5) Collapsible five (5) gallon carry bag
- (4) PPE drop bag
- (4) Tool pouch and belt
- (4) SPEED knife - Large
- (4) Quick knife - Medium
- (4) Scissors - EMT-type
- (4) Head lamp, battery operated
- (5) SDS decontamination media 1 lb. bag
- (1) SDS decontamination media impregnated foot matt
- (24) M-295 mitt decontamination mitt
- (5) Calcium hypochlorite
- (2) Surfactant
- (5) Wash mitts, glove type
- (1) Illustrated operational guidelines
